ABSTRACT OF THE DISCLOSURE

The invention relates to a dermo-cosmetic composition for pets. This composition includes a diffusion solvent vehicle that enables, by a simple application to one or more points of the cutaneous surface, a diffusion over the entirety thereof and at the level of the sebaceous glands. The active ingredients, primarily include a complex of essential oils and poly-unsaturated fatty acids, stored in the sebaceous glands, can be salted out progressively with the sebum product to the surface of the skin.
